

2009/2010 Corporate Flu Vaccination's

Why didn't I get my flu vaccine?

Influenza (the "flu") can be a very serious disease.
Even healthy adults can get sick and miss work.
This can be a nightmare to manage for any business.

Those who get the flu can spread it to family, friends, or co-workers.
Don't get the flu. Don't spread the flu. Get vaccinated.

Why have a workplace flu immunisation programme?

Because they greatly reduce the risk of disruption to your business - and the loss of profit which can ensue from illness in staff related to flu, by reducing the amount of sick time taken associated with the flu.

OHCI Ltd can undertake your workplace flu immunisation programme.

We can arrange to provide vaccinations at your office(s) anywhere in the Channel Islands or Isle of Man.

By doing this we reduce time employees need to be away from the workplace,
OHCI Ltd can offer this service at a competitive, affordable rate.
